

FISHING WEIGHT

HOT GLUE DOME

DARTS CAN BE CHEAPLY MADE AND ARE FAR MORE ACCURATE THAN TRADITIONAL NERF DARTS. CUT LENGTHS OF 1/2" FOAM BACKER ROD (AVAILABLE AT LOWES) TO 1-1/2" LONG. I SUGGEST MAKING A JIG OUT OF SPARE 1/2" PVC. PUT HOWEVER MANY OF THESE BLANKS YOU MADE INTO A PILLOWCASE AND USE RUBBER BANDS TO SEAL THEM IN. PUT IT IN THE DRYER FOR 15 MINUTES ON MEDIUM HEAT. THE HEAT WILL STRAIGHTEN THE BLANKS. USE A HOT GLUE GUN TO BURN A HOLE IN THE TOP OF THE BLANK. I FOUND A MEDIUM HEAT GUN TO WORK THE BEST. PUT A 3/0 FISHING WEIGHT IN THE HOLE YOU MADE AND COVER IT WITH HOT GLUE TO FORM A DOME. DIP THE DOME IN ICE WATER TO SET ONCE DESIRED SHAPE IS REACHED.

THIS PROCESS TAKES TIME, BUT THE DARTS ARE MORE ACCURATE AND CAN BE MADE FOR A COUPLE OF CENTS EACH.
